

Diego Delgado

Diego Delgado holds a PhD in Pharmacy from the University of the Basque Country. Specializing in biomedical research, he has more than 18 years of professional experience. Holding a specialist university degree in Orthopedics, he is Project Management Professional (PMP) certified, and has a master's degree in Clinical Research (Medical Practice Group, Madrid), and another in Project Management (ESDEN Business, Bilbao).

After initiating his career in research at the University of the Basque Country, he graduated as an International Medical Doctor upon completion of his doctoral thesis centered on advanced biological therapies, which resulted in connections with conferences, publications in international scientific journals, and the creation of two patents.

His training includes knowledge in preclinical and clinical research, drug development, biotechnology and biostatistics. Throughout his professional career, he has worked in several centers such as the Department of Pharmacokinetics, Nanotechnology and Gene Therapy (UPV/EHU), Santiago Hospital (Vitoria-Gasteiz) and the Institute of Human Genetics (Regensburg, Germany), as well as collaborating with institutions such as the Center for Networked Biomedical Research in Bioengineering, Biomaterials and Nanomedicine, and the Institute of Bioengineering at the Miguel Hernández University of Elche.

Since 2012, he belongs to Dr. Mikel Sánchez's R&D team, participating in several biomedical research projects oriented towards regenerative medicine. He currently coordinates the Arthroscopic Surgery Unit's research team.
